

Callbacks & Anonymous Functions

Week 2, Class 3: Jamie Pittman

Let's warm up!

Solutions from solvingProblemsWithCode

Learning Objectives:

Callbacks and Anonymous Functions

- Create and use anonymous functions

- Pass anonymous functions as callbacks

- Write functions that accept functions as arguments

Understanding different types of functions

Function Declarations

- Hoisted
- Named and can't be changed

Function Expressions

- Named or anon
- Callbacks
- NOT hoisted

Anonymous Functions

- No name
- IIFE

Arrow Functions

- ES6

Parameters

```
const addArrow = (a, b) => {  
  return a + b;  
}
```

```
addArrow(4,5);
```

Arguments

Arguments and Parameters

Callback Functions Activity

Closures

HTML 101 & HTML Forms

Week 3, Class 1: Jamie Pittman

Learning Objectives:

HTML 101

Understand the basics of HTML

Write HTML

Use a handful of the most-used HTML elements

HyperText Markup

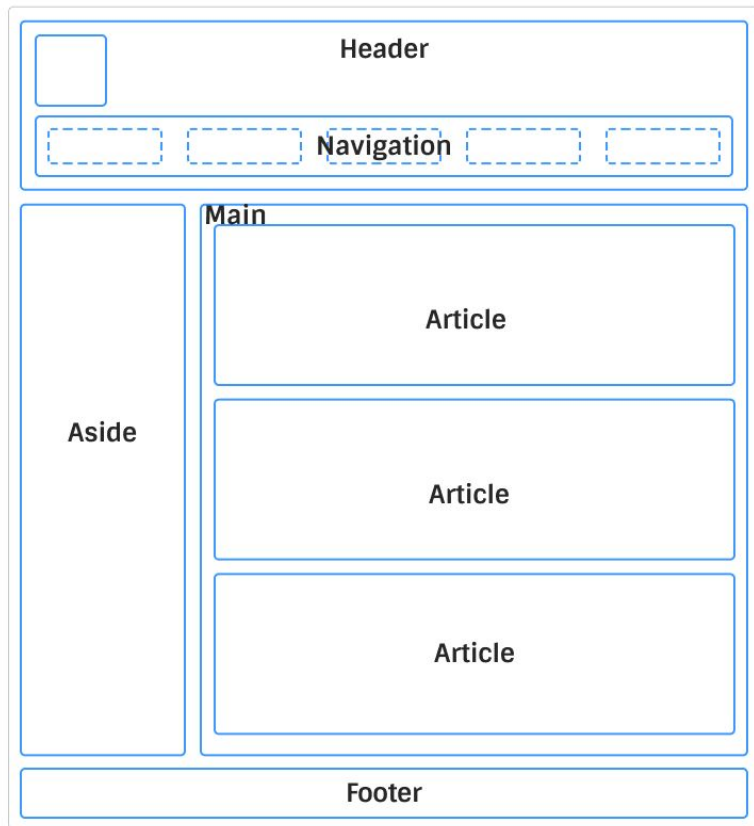

Language

aka

HTML

- Language in which most websites are written
- Latest version: HTML5

HTML: Structure for the Web

HTML Tags and Attributes

Attribute

Tag

```
<button class="key--equal"  
        data-action="calculate">=</button>
```

Creating a valid HTML document

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>Calculator</title>
  <link rel="stylesheet" href="calculator.css">
</head>
<body>
  <!-- STUFF GOES IN HERE -->
</body>
</html>
```

Let's build something...shall we!

JavaScript Calculator

10:00

Ask yourself

What did you
learn to do today?

What surprised
you?

How will you use
what you
learned?
